Board of Directors declaration on the adequacy of risk management arrangements of the institution

The Board of Directors is ultimately responsible for the risk management framework of the Company. The Risk Management framework is the sum of systems, policies, processes and people within the Company that identify, assess, mitigate and monitor all sources of risk that could have a material impact on the Company's operations.

The Board of Directors approves in full the adequacy of Risk Management arrangements of the institution providing assurance that the risk management systems in place are adequate with regards to the institution's profile and strategy.

or loan is involved in the transaction							
Foreign exchange services where these are connected to the provision of investment services							

^{*}Dealing on own account and Portfolio Management licenses were obtained during early 2020.

1.2. Scope

The present report is prepared AC Markets (Europe) Limited (ex Lttrader Limited, the "Company"), a Cyprus Investment Firm ("CIF") authorized and regulated by the Cyprus Securities and Exchange Commission (the "CySEC", the "Commission") under the license number 350/17 which operates in harmonization with the Markets in Financial Instruments Regulation and Directive ("MiFIR" & "MiFID II" respectively).

In accordance with Regulation (EU) No. 575/2013 (the Capital Requirements Regulation, "CRR"), the Company is required to disclose information relating to its risk management, capital structure and capital adequacy as well as the most important characteristics of the Company's corporate governance including its remuneration system. The scope of this report is to promote market discipline and to improve transparency of market participants.

This document is updated and published annually; it will, however, be published more frequently if there are significant changes to the business (such as changes to the scale of operations, range of activities, etc.).

The 2020 Pillar III Disclosures Report sets out both quantitative and qualitative information required in accordance with Part 8 of the CRR, which set the requirements of the disclosures.

The information contained in the Pillar III Market Discipline and Disclosure Report is audited by the Firm's external auditors and published on the Company's websites at www.ausprime.eu on an annual basis.

The Company's business effectiveness is based on the guidelines of the risk management policies and procedures put in place. The Board of Directors ("BoD"), Internal Audit, Risk Manager, Compliance and Anti-Money Laundering Compliance Officer control and supervise the overall risk system so that all units charged with risk management perform their roles effectively on a continuous basis.

Furthermore, the Board of Directors and the Senior Management have the overall responsibility for the internal control systems of capital adequacy assessment, and they have established effective processes to ensure that the full spectrum of risks faced by the Company is properly identified, measured, monitored and controlled to minimize adverse outcomes.

As with all Investment Firms, the Company is exposed to a variety of risks and in particular to credit risk, market risk and operational risk. More information can be found in the sections below.

The Company is making the disclosures on a solo basis.

1.3. The Company

AC Markets (Europe) Limited (ex Lttrader Limited) operates in Europe, offering MiFID II regulated financial instruments with a particular focus on Contracts for Difference ("CFDs"). The Company employed nine (9) people at the end of 2020, all of which were located at its Head offices in Limassol, Cyprus.

The above number excludes the outsourced employees and the non-executive members of the board of directors.

The Company pursues a stable business model, trying to maintain a well-balanced capital allocation in its operations and geographically balanced strategy with a diversified customer base. Furthermore, it ensures that compliance rules are strictly respected, especially in the area of antimoney laundering and counterterrorism financing.

The Company considers its reputation to be an asset of great value that must be protected to ensure its sustainable development. The prevention and detection of the risk of harm to its reputation are integrated within all the Company's operating practices. The Company's reputation is protected by making its employees aware of the values of responsibility, ethical behavior and commitment.

1.4. Regulatory Supervision

All CIFs under CySEC's authority must meet the requirements with respect to capital adequacy and market discipline, as per the below legal framework:

- Law 87(I)/2017 regarding the provision of investment services, the exercise of investment activities and the operation of regulated markets (hereafter "the Law")
- Regulation (EU) No 600/2014 of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Regulation (EU) No 648/2012
- Regulation (EU) No. 575/2013 Capital Requirements Regulation ("CRR")
- Regulation (EU) No. 648/2012 European Markets Infrastructure Regulation
- Directive 2013/36/EU on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms, amending Directive 2002/87/EC and repealing Directives 2006/48/EC and 2006/49/EC - Capital Requirements Directive IV ("CRD IV")

2. Governance and Risk Management

Implementing an efficient risk management structure is a critical undertaking for the Company, in all businesses, markets and regions in which it operates. The Company's risk management is supervised at the highest level in order to be compliant with the regulations enforced by CySEC and the European regulatory framework.

2.1. Types of Risks

The Company operates in the complex financial services industry and in line with its business models the below risks are considered as the most prominent, hence are continuously monitored in order for exposures to be mitigated the soonest possible:

- Credit risk: risk of losses arising from the inability of the Company's customers, issuers or other counterparties to meet their financial commitments.
- Market risk: risk of a loss of value on financial instruments arising from changes in market parameters, the volatility of these parameters and correlations between them. These parameters include but are not limited to exchange rates, interest rates, and the price of securities (equity, bonds), commodities, derivatives and other assets.
- Operational risk: risk of losses arising from inadequacies or failures in internal procedures, systems or staff, or from external events, including low-probability events that entail a high risk of loss.
- Liquidity risk: risk of the Company not being able to meet its cash or collateral requirements as they arise.
- Compliance risk: risk of legal, administrative or disciplinary sanctions, or of material financial losses, arising from failure to comply with the provisions governing the Company's activities.
- Reputational risk: risk arising from a negative perception on the part of customers, counterparties, shareholders, investors or regulators that could negatively impact the

- Company's ability to maintain or engage in business relationships and to sustain access to sources of financing.
- Interest rate risk: is the risk that the value of financial instruments will fluctuate due to changes in market interest rates.
- Currency risk: is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates.
- **Litigation risk:** is the risk of financial loss, interruption of the Company's operations or any other undesirable situation that arises from the possibility of non-execution or violation of legal contracts and consequentially of lawsuits.
- Capital management risk: Risk of not complying with the legislation regarding the Capital Adequacy Requirements and Ratios.

2.2. Risk Appetite

The Company defines Risk Appetite as the level of risk, by type and by business that the Company is prepared to incur given its strategic targets. The Risk Appetite Framework weights earning sensitivities to business cycles versus credit, market and operational events. The Risk Appetite is one of the strategic oversight tools available to the Management bodies. It underpins the budgeting process and draws on the ICAAP, which is also used to ensure capital adequacy under stressed economic scenarios.

Key Risk Appetite metrics

For 2020, the Company's risk appetite is defined as follows: Combining the below Risk Assessment and taking into account the Probability/Impact Matrix, the Company stands willing to accept risks rated A and B, whilst it does not tolerate risks falling within categories C and D (i.e. having a score of more than, or equal to 10), which are deemed material. Having defined the materiality threshold of the risks, and having identified those breaching it, the Company attempts to lower the risk category of any material risk identified (at least to a risk rated B).

Probability of Risk Occurring:

Score Level	Description	Frequency	
6	Certain to occur	Occurs Monthly	
5	Expected/likely	At the once	
5	to occur	Quarterly	
4	Frequent	Quarterly to Annually	
3	Occasionally	Every 1-5 years	
2	Unlikely	Every 5-20 years	
1	Rare	Every 20 years or	
1	nare	more	

Impact of Risk:

Score Level	Risk Scale	Financial Impact (yearly in EUR)		
1	Minor/Low/ Insignificant	0-10.000		
2	Moderate/Medium	10.001-50.000		
3	High	50.001-100.000		
4	Major	100.001-150.000		
5	Critical	150.001-200.000		
6	Catastrophic	>200.001		

Probability/ Impact Matrix:

	Impact of Risk						
쏬		1	2	3	4	5	6
f Ris	6	В	C2	C3	D1	D2	D3
ty o	5	В	C1	C2	C3	D1	D2
iig	4	В	В	C1	C2	C3	D1
Probability of Risk	3	В	В	В	C1	C2	С3
<u>P</u>	2	Α	В	В	В	C1	C2
	1	Α	Α	В	В	В	C1

Levels for performing capital allocation:

Risk Category	Capital Requirement as a % of the potential financial impact (yearly) of the Risk
C1	15%
C2	30%
С3	45%
D1	60%
D2	75%
D3	90%

Furthermore, the positioning of the business in terms of risk/return ratio as well as the Company's risk profile by type of risk are analyzed and approved by the BoD. The Company's risk appetite strategy is implemented by the Senior Management in collaboration with the BoD and applied by all divisions through an appropriate operational steering system for risks, covering the whole Governance, Risk and Compliance ("GRC") spectrum.

Essential indicators for determining the Risk Appetite are regularly monitored over the year to detect any events that may result in unfavorable developments on the Company's risk profile. Such events may give rise to remedial action, up to the deployment of a recovery plan in the most severe cases.

2.3. Internal Capital Adequacy Assessment Process

The Internal Capital Adequacy Assessment Process ("ICAAP") requires institutions to identify and assess risks, maintain enough capital to face these risks and apply appropriate risk-management

techniques to maintain adequate capitalization on an ongoing and forward-looking basis, i.e., internal capital supply to exceed internal capital demand.

The Company maintains compliance with the ICAAP as required under CRR, through risk management and governance framework, methodologies, processes and infrastructure.

In line with the CRR requirements, the key instruments to help the Company maintain adequate capitalization on an ongoing and forward-looking basis are:

- A strategic planning process which aligns risk tolerance and appetite with commercial objectives;
- A continuous monitoring process against approved risk and capital targets set;
- Regular risk and capital reporting to management; and
- An economic capital and stress testing framework which also includes specific stress tests to underpin the Company's recovery monitoring processes.

The ICAAP also serves as a stress testing tool used by the Company to rehearse the business response to a range of scenarios, based on variations of market, economic and other operating environment conditions. Stress tests are performed for both internal and regulatory purposes and serve an important role in:

- Understanding the risk profile of the Company
- The evaluation of the Company's capital adequacy in absorbing potential losses under stressed conditions (This takes place in the context of the Company's ICAAP on an annual basis)
- The evaluation of the Company's strategy. Senior management considers the stress test results against the approved business plans and determines whether any corrective actions need to be taken. Overall, stress testing allows senior management to determine whether the Company's exposures correspond to its risk appetite
- The establishment or revision of limits. Stress test results, where applicable, are part of the risk management processes for the establishment or revision of limits across products, different market risk variables and portfolios

The Company has updated its latest ICAAP during April 2021.

2.4. Diversity Policy

Diversity is increasingly seen as an asset to organizations and linked to better economic performance. It is an integral part of how the Company does business and imperative to commercial success.

The Company recognizes the value of a diverse and skilled workforce and management body (including the Board of Directors), which includes and makes use of differences in the age, skills, experience, background, race and gender between them.

The Company is committed to creating and maintaining an inclusive and collaborative workplace culture that will provide sustainability for the organization into the future.

The Company considers itself diverse in regards to its main workforce but has also established a specific diversity policy in relation to its management body and in 2020 it made an effort to align with this policy.

2.5. Board Recruitment

The Company and its shareholders rely on a strong Board of Directors, hence they carefully evaluate, based on a predefined policy, the recruitment of all Directors and ensure appropriate succession planning. The Senior Management is assigned the responsibility to review the qualifications of potential director candidates and make recommendations to the existing BoD to ensure selecting the most appropriate candidate.

The persons proposed for the appointment need to have specialized skills and/or knowledge to enhance the collective knowledge of the BoD and most importantly emphasis is given on their commitment in terms of time and effort.

Furthermore, the Company considers the following factors (which also form the basis of its BoD recruitment policy):

- 1. Integrity, honesty and the ability to generate public confidence
- Knowledge of and experience with financial institutions ("fit-and-proper")
- 3. Knowledge of financial matters including understanding financial statements and financial ratios
- 4. Demonstrated sound business judgment
- 5. Specialised skills and/or knowledge in accounting, finance, banking, law, business administration or related subjects

2.6. Remuneration

Remuneration refers to payments or compensations received for services or employment. The Company's remuneration system includes the base salary and occasionally bonuses or other economic benefits that an employee or executive may receive during employment. These benefits are frequently reviewed in order to always be appropriate to the CIF's size, internal organization and the nature, scope and complexity of its activities.

The Company's remuneration system is designed to regulate the benefits of all employees with particular focus on those categories of staff whose professional activities have a material impact on its risk profile, such as the Senior Management, Heads of the Departments and the members of the Board of Directors. In the case of the latter, the remuneration policy is designed in such a way as to provide the right incentives to achieve the key business aims of the Company.

The Company's remuneration, consists of fixed and variable components which are appropriately balanced so that the fixed component represents a sufficiently high proportion of the total

remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component.

Table 2: Aggregate Quantitative Information on Remuneration broken down by business area

€ thousands	No. of	Fixed	Variable	Non-cash	Total
	staff				
Board of Directors	7	190.397	0	0	190.397

(Excluding Board or Senior					
Members)					
Grand Total	14	333.669	0	0	333.669

2.7. Directorships held by Members of the Management Body

The Company's members of the Management Body, and in particular of the non-Executive positions, are often experienced professionals and businessmen that are invited to participate in other corporate boards. In line with this, the Company is responsible to approve and monitor such individuals in terms of conflicts of interest. In 2020, the following table summarizes the number of positions that each member holds in entities whose services and activities are related to the provision of financial services:

Table 3: Directorships held by Members of the Management Body

Name	Position in the Company	Executive	Non-
		Directorships	Executive
			Directorships
Mrs. Lingmei Dimitriou	Executive Director	1	0
Mr. Panayiotis Louca	Executive Director	1	0

2.9. Additional events

There is an uncertainty about the consequences of the COVID-19 pandemic (Coronavirus) and about the impact it has had on the global economy, the deterioration of the global assets and the increase in global financial volatility.

In this regard, various national and supranational authorities are taking measures to mitigate its effects. Among others, on March 12, 2020, the EBA and ECB have announced transitional measures to mitigate the impacts of COVID-19 on the European banking sector.

ESMA, in its initial statement on the COVID-19 pandemic on 11 March, made among others the following recommendations to financial market participants: Business Continuity Planning - All financial market participants, including infrastructures should be ready to apply their contingency plans, including deployment of business continuity measures, to ensure operational continuity in line with regulatory obligations; In general the overall future economic outlook of the economy remains unstable due to the recent developments on the outbreak of Coronavirus (COVID-19).

In particular, and following the outbreak of COVID-19 in Cyprus, the Firm has taken the required measures to ensure that its employees have access to its technology infrastructures necessary for the completion of their tasks and that additional system for critical functions are being provided. In this respect, the Business Continuity Plan has been amended accordingly.

Furthermore, the Company is closely monitoring the impact of COVID-19 on its financial position in order to be able to take proactive measures.

3. Capital Management and Adequacy

Capital management and adequacy of liquid funds are paramount priorities of both regulators and investment firms. The Company, operates in line with these priorities, continuously monitoring its capital reserves and risk exposures. This is currently performed in accordance with the Capital Requirements Regulation.

3.1. Regulatory Capital

In line with the International Financial Reporting Standards (IFRS) and CRR, the Company's regulatory capital mainly consists of Common Equity Tier 1 Capital.

Common Equity Tier 1 capital is composed primarily of ordinary shares (net of repurchased shares and treasury shares) and related share premium accounts and retained earnings. Other components can be included only if they are in accordance with the strict CRR rules. Additionally, and in line with the above, deductions from the Common Equity Tier 1 capital involve mainly the removal of current year loses, estimated dividend payments as well as goodwill and intangible assets.

In some cases, additional capital tiers can come into force such as the Tier 2 Capital which could introduce the use of loans to support the business and operational capital. Such loans are highly regulated and are always subordinated to other claims.

3.2. Capital Ratio

The capital (adequacy) ratio is a key metric for a financial institution and is calculated by comparing the institutions' capital base with the sum of risk-weighted assets from 3 major risk categories (credit, market, operational risk). The calculation always follows a strict set of rules defined in CRR. The minimum Total Capital Ratio that must be maintained AT ALL times is 8%.

The Company, as at 31 December 2020, had a Total Capital Ratio of 15.57%.

3.3. Capital Management

As part of managing its capital, the Company ensures that its solvency level is always compatible with the following objectives:

Maintaining its financial solidity and respecting the Risk Appetite targets

- Preserving its financial flexibility to finance organic growth
- Adequate allocation of capital among the various business lines according to the Company's strategic objectives
- Maintaining the Company's resilience in the event of stress scenarios
- Meeting the expectations of its various stakeholders: regulators, debt and equity investors, rating agencies, and shareholders

The Company determines its internal capital adequacy targets in accordance with the above and the Senior Management is tasked to monitor the Capital on a constant basis.

Further to the above, the Company is obligated to calculate and report its capital adequacy on a quarterly basis to the Cyprus Securities and Exchange Commission (the "CySEC").

Below you may find the latest results reported for 2020 in comparison with 2019:

Table 5: Capital Requirements (€ thousands)

€ thousands	Dec 31, 2020	Dec 31, 2019

4. Credit Risk

Credit risk corresponds to the risk of losses arising from the inability of the Company's customers, issuers or other counterparties to meet their financial commitments.

Credit risk mainly arises by the Company's deposits in credit and financial institutions and by assets mainly held from debtors or prepayments made.

The Company follows the Standardized Approach under Pillar I for calculating its Credit Risk Capital Requirements, as specified in CRR. It categorizes the assets in respect to their exposure class and uses the Credit Quality methodology (point 4.1 below) to determine its Risk Weights (RW).

The Company follows both regulatory and compliance-oriented credit risk mitigation strategies in order to minimize the possibility of occurrence of this risk, such as:

- All Client funds are held in segregated accounts, separated from Company's funds.
- The Company maintains regular credit review of counterparties, identifying the key risks faced and reports them to the Board of Directors, which then determines the firm's risk appetite and ensures that an appropriate amount of capital is maintained.
- In order to maintain its Credit risk to the minimum, the Company is using EU credit institutions for safekeeping of funds and it frequently monitors their compliance with the EU regulatory framework and diversifies the funds over several credit institutions thus mitigating the risk exposure efficiently.

Further to the above, the Company has policies to diversify credit risk and to limit the amount of credit exposure (concentration risk) to any particular counterparty, at all times.

4.1. Credit Ratings

For the purpose of calculating the capital requirements of the Company, mainly under the credit risk requirement, the Company sources its credit ratings from Moody's Analytics.

Based on the above, the Company uses the rating values and matches them to the relevant Credit Quality Step as per CRR in order to calculate the weighted credit risk exposure:

Credit	Moody's	Institution	Institution	Sovereigns	Corporate
Quality	Rating	Risk Weight	Risk Weight	(Central	Risk
Step		(Below 3	(Above 3	Government)	Weight
		months)	months)	Risk Weight	
1	Aaa to Aa3	20%	20%	0%	20%
2	A1 to A3	20%	50%	20%	50%
3	Baa1 to Baa3	20%	50%	50%	100%
4	Ba1 to Ba3	50%	100%	100%	100%
5	B1 to B3	50%	100%	100%	150%
6	Caa1 and below	150%	150%	150%	150%

For exposures to regional governments or local authorities, public sector entities and institutions, the external ratings are applied in the following priority (i) Issuer/Exposure, (ii) Issuer/Counterparty, (iii) Sovereign.

For exposures to central governments or central banks and corporates the external ratings are applied in the following priority (i) Issuer/Exposure, (ii) Issuer/Counterparty.

Where exceptions or discretions as per the CRR apply, the external ratings are not taken into consideration and a preferential treatment is followed.

4.2. Exposure Analysis

At 31st December 2020, the Company's capital requirements for credit risk amounted to EUR29.157 (EUR364.458 total risk-weighted credit risk exposure). The tables below indicate the Company's credit risk exposure.

Disclosure and Market Discipline Report for 2019

5. Market Risk

Market risk corresponds to the risk of a loss of value on financial instruments arising from changes in market parameters, the volatility of these parameters and correlations between them. These parameters include but are not limited to exchange rates, interest rates, and the price of securities (equity, bonds), commodities, derivatives and other assets. Market risk mainly arises from:

- 1. Interest rate risk: The risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.
- 2. Foreign Exchange Risk: It is a financial risk that exists when a transaction is denominated in a currency other than the base currency of the company. The foreign exchange risk in the Company is effectively managed by the establishment and control of foreign exchange limits, such as through the establishment of maximum value of exposure to a currency pair as well as through the utilization of sensitivity analysis.

The Company monitors its market risk exposures on a quarterly basis and has policies in place to mitigate excess exposure.

In 2019, the Company's market risk mainly emanated from foreign exchange fluctuations which affect the Company's deposits in banks or reserves held that are denominated in foreign currencies.

5.1. Exposure Analysis

The Company's capital requirements related to market risk are mainly determined using the standardized approach and as at 31 December 2020, total capital usage for market risk can be seen below:

Table 13: Market risk capital requirements

€ thousands	RWAs	Capital Requirements
Foreign exchange risk	313	25
Interest rate risk	0	0
Total	313	25

Disclosure and Market Discipline Report for 2019

6. Operational Risk

Operational risk corresponds to the risk of losses/failure arising from inadequacies or failures in internal procedures, systems, or staff, or from external events, including low-probability events that entail a high risk of loss. (This section describes the monitoring of the Company's operational risk, in addition to providing an analysis of the Company's operational risk profile and regulatory capital requirements)

The Company has developed processes, management tools and a control infrastructure to enhance the Company-wide control of its operational risks that are inherent in its various activities. These include, among others, specific procedures, permanent supervision, business continuity plans, and functions dedicated to the oversight and management of specific types of operational risks, such as fraud, risks related to external service providers, legal risks, information system security risks and compliance risks.

The Company recognizes that the control of operational risk is directly related to effective and efficient management practices and high standards of corporate governance and with this "policy" like approach aims to minimize the impact of losses suffered, both in the normal course of business (small losses) and from extreme events (large losses), and to improve the effective management of the Company and strengthen its brand and external reputation.

In extend, the management of operational risk is geared towards:

- Maintaining a strong internal control governance framework.
- Managing operational risk exposures through a consistent set of processes that drive risk identification, assessment, control and monitoring.

In line with the above, the Company implements the below mitigation strategies in order to minimize its Operational Risks and to develop risk awareness and culture:

- Provide of adequate information to the Company's management, in all levels, in order to facilitate decision making for risk control activities.
- Implement a strong system of internal controls to ensure that operational losses do not cause material damage to the Company and have a minimal impact on profitability and objectives.
- Implement improvements on productivity, efficiency and cost effectiveness, with an objective to improve customer service and protect shareholder value.
- Establish a "four-eye" structure and board oversight. This structure ensures the separation of power regarding vital functions of the Company namely through the existence of a Senior Management. The Board further reviews any decisions made by the Management while monitoring their activities;
- Implement improvements on its methods of detecting fraudulent activities;

Disclosure and Market Discipline Report for 2019

Updating its business contingency and disaster recovery plan.

Finally, the Senior Management employs specialized tools and methodologies to identify, assess. mitigate and monitor operational risk. These specialized tools and methodologies assist operational risk management to address any control gaps. To this effect, the following are implemented:

- Incident collection
- **Key Risk Indicators**
- Business Continuity Management
- Training and awareness

6.1. Exposure Analysis

The Company adopted the Basic Indicator Approach ("BIA") for calculating its Operational Risk capital requirements. Under the Basic Indicator Approach the capital requirement is equal to 15% of the relevant indicator, the relevant indicator being the three year average of the sum of gross income and in the absence of historical data, the estimates made in the Business Plan of the Company are used.

The risk exposure amount for operational risk as of December 31, 2020 was EUR5.043 thousands and the capital requirement at EUR403 thousands.

The Company used the fixed overhead method as of December 31, 2019 with the fixed overhead requirement calculated to EUR143 thousands and the risk weighted exposure (arising from the additional fixed overhead requirements) was zero.

Disclosure and Market Discipline Report for 2019

7. Liquidity risk

Liquidity risk corresponds to the risk of the Company not being able to meet its cash or collateral requirements as they arise and at a reasonable cost.

The Company's primary objective is to ensure the funding of its activities in the most cost-effective way by managing liquidity risk and adhering to regulatory constraints. The principles and standards applicable to the management of liquidity risks are defined by the Company's governing bodies, whose duties in the area of liquidity are listed below:

- The Company's Board of Directors establishes the level of liquidity risk tolerance as part of the Risk Appetite exercise and meets regularly to examine the Company's liquidity risk
- The Senior Management sets budget targets in terms of liquidity and allocates liquidity reserve accordingly

To minimize its exposure to liquidity risk, the Company implements the below mitigation strategies:

- Regular analysis & reporting to the Board of Directors on the funding needs of the Company
- Monitoring of the Company's exposures and diversification to avoid rise of concentration risk as per the internal policies

The Company has undertaken a specific review of its liquidity risks and believes that it is able to meet its upcoming obligations. As at 31/12/2020, the Company held EUR866.785 in its bank and liquidity provider accounts.

Safeguarding of client Assets

The client assets held in fiduciary capacity (in segregated accounts) were EUR113.789.

The Company is taking due care in safeguarding these assets and performs the following mitigation strategies:

- These assets are held by the Company in a fiduciary capacity and are not included in the Company's funds nor its financial statements
- The funds are held in client segregated bank accounts
- Frequent reconciliations are performed internally and also from the External Auditors which also are tasked to verify and submit to CySEC annual reports

Disclosure and Market Discipline Report for 2019

8. Compliance, Reputational and Legal Risks

Compliance risk corresponds to the risk of legal, administrative or disciplinary sanctions or material financial losses, arising from failure to comply with the provisions governing the Company's activities.

Compliance means acting in accordance with applicable regulatory rules, as well as professional, ethical and internal principles and standards. Fair treatment of customers, with integrity, contributes decisively to the reputation of the Company.

By ensuring that these rules are observed, the Company works to protect its customers and, in general, all its counterparties, employees, and shareholders.

The Compliance Officer verifies that all compliance laws, regulations and principles applicable to the Company's services are observed, and that all staff respect the codes of good conduct and individual compliance. The Compliance Officer also monitors the prevention of reputational damage, performs compliance controls at the highest level and assists with the day-to-day operations. The Compliance Officer is responsible for:

- The Company's financial security (prevention of money laundering and terrorism financing; know-your-customer obligations; embargoes and financial sanctions)
- Developing and updating consistent standards for the function, promoting a compliance culture, coordinating employee training and managing Company regulatory projects
- Coordinating a compliance control mechanism within the Company, overseeing a normalised Compliance process, oversight of personnel operations and, finally, managing large IT projects for the function
- Preventing and managing conflicts of interest
- Proposing ethical rules to be followed by all Company employees
- Training and advising employees and raise their awareness of compliance issues
- Building and implementing steering and organisational tools for the function: Compliance and Reputational Risk dashboards, forums to share best practices, meetings of functional compliance officers
- Generally monitoring subjects likely to be harmful to the Company's reputation

Independent compliance "policies" have been set up within the Company's different business lines to identify and prevent any risks of non-compliance.

8.7. Anti-Money Laundering and Terrorist Financing

Money laundering and terrorist financing risk mainly refers to the risk where the Company may be used as a vehicle to launder money and/or assist/involved in financing terrorism.

Disclosure and Market Discipline Report for 2019

The Company has in place policies, procedures and controls in order to mitigate the money laundering and terrorist financing risks. Among others, these policies, procedures and controls include the following:

- The adoption of a risk-based approach that involves specific measures and procedures in assessing the most cost effective and appropriate way to identify and manage the Money Laundering and Terrorist Financing risks faced by the Company
- The adoption of adequate Client due diligence and identification procedures in line with the Clients' assessed Money Laundering and Terrorist Financing risk
- Setting certain minimum standards of quality and extent of the required identification data for each type of Client (e.g. documents from independent and reliable sources, third party information)
- Obtaining additional data and information from Clients, where this is appropriate and relevant, for the proper and complete understanding of their activities and source of wealth and for the effective management of any increased risk emanating from a Business Relationship or an Occasional Transaction
- Monitoring and reviewing the business relationship or an occasional transaction with clients and potential clients of high-risk countries
- ensuring that the Company's personnel receive the appropriate training and assistance

The Company is frequently reviewing its policies, procedures and controls with respect to money laundering and terrorist financing to ensure top level compliance with the applicable legislation.
